

FAB Portfolio Risk Analytics Report

Capital, Liquidity, Asset Quality & Efficiency Trends — Q2 2024

Document Reference	FAB-RSK-ANLY-2024-Q2
Prepared By	Credit Risk Analytics, Group Risk Management
Period Covered	Q3-2022 through Q2-2024
Classification	Confidential — Internal Use Only (Mock POC Data)
Related Documents	FAB-CRP-CONC-2024-v1.8 · FAB-POL-PRICE-2024-v2.4 · FAB-MRM-FW-2024-v3.1

1. Capital Adequacy Trend

FAB Group's capital ratios have strengthened steadily over the trailing eight quarters, driven primarily by retained earnings accretion. All three ratios — CET1, Tier 1, and Total CAR — remain comfortably above the Basel III plus UAE-specific buffer minimum of 10.5% Total CAR.

Figure 1.1 — CET1, Tier 1 and Total Capital Adequacy Ratios, Q3-2022 to Q2-2024.

2. Liquidity Position Trend

Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) are tracked weekly against the CBUAE regulatory minimum of 100%. Both ratios have remained above minimum throughout the period, with a dip in Q1-2023 that triggered enhanced monitoring but did not breach the regulatory floor.

Figure 2.1 — LCR and NSFR trend vs. 100% regulatory minimum, Q3-2022 to Q2-2024.

3. Asset Quality — IFRS 9 Stage Migration

The chart below tracks the migration of the corporate credit portfolio across IFRS 9 impairment stages. The Stage 2 (significant increase in credit risk) share has nearly doubled over the observation period, consistent with the NPL ratio trend in the companion analysis, and warrants continued monitoring under the Model Risk Management Framework (FAB-MRM-FW-2024-v3.1, §4).

Figure 3.1 — IFRS 9 Stage 1/2/3 exposure as % of total corporate portfolio, Q3-2022 to Q2-2024.

4. Operating Efficiency Trend

Cost-to-income ratio and return on equity are the two primary profitability metrics reported to the Board Risk & Compliance Committee alongside RAROC (see FAB-POL-PRICE-2024-v2.4, §2.2). Both metrics have trended favourably over the period — cost-to-income declining and ROE rising above the 13.5% hurdle rate.

Figure 4.1 — Cost-to-income ratio and ROE trend, Q3-2022 to Q2-2024.

READING NOTE: All figures in this report are illustrative mock data generated for RAG proof-of-concept testing and do not represent FAB's actual financial position.
