### 1. Pricing Approval Escalation Path

The diagram below illustrates the escalation ladder defined in the Credit Pricing Policy §5.1, from front-line approval up to the Group Credit Committee, driven by facility size and client credit rating.

## 2. GERNAS Human-in-the-Loop Control Flow

CBUAE Circular 2024/BSE/047, Article 5, mandates human review and approval for all HIGH-risk AI/ML recommendations. The process flow below shows how the GERNAS Pricing Agent's recommendation moves through mandatory human review, decision logging, and override-rate monitoring.

Figure 2 — Human-in-the-loop control flow for AI-generated pricing recommendations.

## 3. AI Governance Reporting Structure

The org chart below shows the reporting lines for AI governance accountability, from the Board Risk & Compliance Committee down to the AI Risk Officer, Model Risk Management team, and Independent Validation function, per CBUAE Circular Article 2 and the FAB Model Risk Management Framework.

Figure 3 — AI governance reporting and oversight structure.
