

FAB Portfolio Risk Analytics Report

Corporate Credit Portfolio — Charts, Heatmaps & Pricing Grids — Q2 2024

Document Reference	FAB-RSK-ANLY-2024-Q2
Prepared By	Credit Risk Analytics, Group Risk Management
Period Covered	Q3-2022 through Q2-2024
Classification	Confidential — Internal Use Only (Mock POC Data)
Related Policies	FAB-CRP-CONC-2024-v1.8 · FAB-POL-PRICE-2024-v2.4

1. NPL Ratio & Exposure Trend

The chart below tracks FAB's corporate portfolio NPL ratio against total exposure growth over the trailing eight quarters. The NPL ratio has trended upward toward the Board-approved 2.50% threshold, alongside continued exposure growth.

Figure 1 — NPL ratio (line, left axis) vs. total corporate exposure (bars, right axis), Q3-2022 to Q2-2024.

2. Sector Concentration vs. Limits

Current sector utilisation is shown against the soft and hard concentration limits defined in the Credit Concentration & Exposure Limits Policy (FAB-CRP-CONC-2024-v1.8, §3). Real Estate — UAE remains the largest single-sector exposure, approaching its soft limit.

Figure 2 — Current sector utilisation vs. soft/hard limits, as at Jun-2024.

3. RAROC Heatmap — Rating × Sector

The heatmap below shows indicative RAROC by client rating band and sector for corporate term loans. Cells marked with an asterisk fall below FAB's 13.5% post-tax RoE hurdle rate (Credit Pricing Policy §2.2) and would require Relationship Value justification or a Pricing Exception to proceed.

Figure 3 — RAROC (%) by client rating and sector, Q2-2024. Green = above hurdle, red = below hurdle.

4. Pricing Floor Reference Grid

The pricing grid below is reproduced from the Credit Pricing Policy (FAB-POL-PRICE-2024-v2.4, Table 3.1) in its original merged-header layout, as it commonly appears in scanned or exported policy attachments.

Client Rating	Table 3.1 — Corporate Term Loan Pricing Floors (bps over FTP)				Notes
	Client Rating × Facility Tenor — merged header, sub-columns for tenor bucket ≤ 1 Year	1-3 Years	3-5 Years	> 5 Years	
AAA / AA	65 bps	80 bps	100 bps	130 bps	Investment grade sovereign / quasi-sov.
A	85 bps	105 bps	130 bps	165 bps	Strong investment grade corporate
BBB	115 bps	145 bps	180 bps	220 bps	Standard investment grade
BB	165 bps	210 bps	260 bps	320 bps	Sub-investment grade / leveraged
B	240 bps	300 bps	370 bps	450 bps	Speculative — senior credit approval
CCC & below	NOT PERMITTED WITHOUT GROUP CREDIT COMMITTEE APPROVAL				See Section 6 — Pricing Exceptions

Note: Rows and header cells are merged/spanned in the source layout — a common structure in FAB pricing grids that plain-text extraction typically flattens incorrectly.

Figure 4 — Corporate Term Loan pricing floors by rating × tenor, with merged header cells.
